TwinLuxe is a line of fine grooming products for the modern man. TwinLuxe's shaving skincare line consists of multi-functional formulations with a 'TwinLuxe Blend' core of soothing Asian botanicals, such as hydrolyzed rice protein and centella asiatica extract, scientifically-proven to help strengthen skin tone, improve skin smoothness, and promote anti-aging properties.

The luxury skincare line is rapidly garnering the rep for being the best of the best in the biz. TwinLuxe's Essentials Gift Set for shaving was the featured men's grooming product in the official Grammy gift bags issued to presenters and performers at the 53rd Grammy Awards in Los Angeles.

The firm sells luxury shaving instruments and accessories too. The designer of the exterior of the Rolls-Royce Phantom, Marek Djordjevic, also designed TwinLuxe's elegant and rugged shaving sets. The same materials used in supercars, fine wristwatches and surgical equipment are used in the shaving sets. The Arctic, which is the highest priced of the three models available at \$1,588, is made from a solid white alumina ceramic. The same material is used in the making of engine parts and ballistic armor.

The founders of TwinLuxe, twin brothers Anthony and Hubert Tsai, say they aim to make products that they would want to use themselves. And the Tsais do not only own TL; they also personally assemble each shaving set. For more information visit TwinLuxe.com.
