There are very few anti-aging moisturizers on the market that have an SPF benefit. So for men who choose an anti-aging moisturizer for daily use, and want a way to fight the sun's aging rays, their only option is to add a layer of sunscreen.

TwinLuxe recognized an area of need and worked to fulfill it with their very own [Anti-Aging SPF Moisturizer](#). Packed with ingredients that aid the skin instrengtheningand regenerating cells (ex. [Buddleja Davidi Stems](#)) along with ingredients like – Hydrolized Rice Protein, Willow Bark Extract for oil control and moisture. **SPF 40** is the choice for this moisturizer, with the new "[Broad Spectrum](#)" development and labeling.

It's fairly light-weight considering the blend of anti-agingredients and sunscreen. Non-whitening (**major plus!**), [non-comedogenic](#), fragrance & paraben free.

Rating:★★★★¼
