

INVENT DISCOVER FASHION ART

TwinLuxe stands for a revolutionary change in shaving - transforming a daily chore into a luxurious daily ritual. TwinLuxe Fine Shaving Instruments are designed by world renowned designer Marek Djordjevic, whose works include exterior designs of the Rolls-Royce Phantom family of cars. "My goal was to reflect the vision of TwinLuxe founders and embody the values of authenticity and masculine presence in a modern expression of craftsmanship and luxury," says Djordjevic. Inspired by the timeless symbols of strength and status, these highly refined instruments deliver the pinnacle shaving experience. The solid design of TwinLuxe shave sets exudes confidence through their weight and feel. By incorporating the materials and finishes from advanced technologies found in fine wrist watches, exotic automobiles, and surgical instruments, TwinLuxe brings the traditional shaving tools into the 21st century. The TwinLuxe experience consists of two synchronized elements:

SHAVE

TwinLuxe 'Fine Shaving Instruments' are manufactured with the utmost respect and attention to design, craftsmanship and materials, using only the most innovative technologies for a perfected performance. Shaving has never been this accurate or elegant. Shaving takes on a big role in the average man's life - the time spent shaving in one's lifetime would be the equivalent of time walking from Los Angeles to New York and back - twice! With the proper technique, shave instruments, and skincare, the monotonous task of shaving can be transformed into a soothing, pampering ritual. Bring the professional barbershop experience into your own home.

CARE

TwinLuxe 'Shaving Skincare' is a range of luxurious formulations that can be combined for a customized result. The unique, innovative products are based on a powerful custom blend of Asian botanicals such as Pearl Powder and Hydrolyzed Rice Protein, to offer care tailored to individual needs.
